PROBATE CASES  
(ORIGINAL DOCUMENTS - DISPOSED CASES)  
CASES 1 - 3,100  
1846 - EARLY 1900's  
  
MICROFILMED  
BY  
DALLAS GENEALOGICAL SOCIETY  
P. O. Box 12648  
DALLAS, TEXAS 75225

DATE OF FILMING: OCTOBER 1977 TO FEBRUARY 1978

DALLAS COUNTY PROBATE RECORDS  
MICROFILM PROJECT

Our Society undertook the microfilming of the first 3,100 (1846 - early 1900's) ORIGINAL Probate Packets of Dallas County, Texas (estate, guardianship, lunacy). This project was undertaken because of a need to preserve the aging documents which contain much materials that is usually not entered into the Probate Record Books (suchas: personal letters, vouchers, bills, signatures, etc.). These are the ORIGINAL documents and papers. The records, although well kept for the most part, are deteriorating from age. Due to the poor quality of paper used in some of the records, much care had to be taken to keep them from crumbling before they could be microfilmed. Many documents had to be repaired and put back together. For example: we found a will that was four handwritten pages and it was torn into approximately 30 pieces. By careful reading, it was possible to match up the words from one piece of paper to another and put the pieces back in order, repair and then film it. We were not selective in filming these records. Every scrap of paper in each packet was microfilmed, including vouchers which sometime numbered into the hundreds.

Many times large numbers of the names of relatives, friends, business associates, creditors and neighbors were found in these packets. Other times the deceased had so few worldly possession that only one page was needed to settle his estate.

The project began on October 18, 1977 after much preparation had gone into its planning. It has taken over 2½ months, working 5 days a week, averaging 6 hours a day with 4 volunteer members each day (one to open the packets and unfold the documents and papers, one to place the papers on the camera, one to lay the glass on the papers to flatten it for filming and taking the picture, and the fourth person, removing the papers from the camera, folding them and placing them back into the packet. It was real team work among the eighteen members, working over a total of 1,200 hours to accomplish this much needed and worthwhile project. In addition to the eighteen members working on the filming, another five were involved in preparing the index to these probate cases.

As these records were being microfilmed, our members learned more of Dallas history and its people than one can imagine. From the aging documents we saw Dallas County grow from a sparsely settled area to a thriving community. We saw small communities appear in various parts of the county and large pieces of farm land turn into residential and business areas. We saw progress unfold before our eyes. We have lived an experience of knowing Dallas County as we never knew it before, and we are very proud to have helped preserve some of Dallas County history even though most of us had no Dallas ancestors.

PROJECT CHAIRMEN: Helen Lu and Margaret Smith.

Without the dedicated help of the following Dallas Genealogical Society members this project could not have been completed.

MICROFILMING TEAM: Mary Badget, Anna Baker, Judy Ceccucci, Minnie Champ, Anne Cochran, Bill Crawford, Bob Garvie, Lois Hayes, Adrienne Jamieson, Helen Lu, Gwen Neumann, Millicent McCoy, Lola Van Pierce, Gladys Pointer, Margaret Smith, Renee Smith, Margaret Ann Thetford, Anne Trickett.

INDEXING STAFF: Alline McCrary, Nell Dishman, Mary Sue Caruth, Carol Dillon, Anne Cochran, Judy Ceccucci, Glynn Ferguson, Adrienne Jamieson, Gwen Neumann, Gladys Pointer, Margaret Smith, Helen Lu, Lois Hayes, Louise Anderson, Lola Engelhart, Judy Filingeri, Deborah Watts.

Our sincere appreciation to L. E. 'Larry' Murdoch, County Clerk of Dallas County, Texas and his entire staff for the courtesy shown the Dallas Genealogical Society and their interest in this much needed and worthwhile project.

Index symbols:

- \* - Original documents missing. Names obtained from original disposed case index book.
- \*\* - Microfilmed as missing, however cases were located and were filmed following case 3,100.

Number or Letter preceding case number - indicates a case number was assigned to more than one individual and a letter or number was added to differentiate the different cases.

#### INTRODUCTION

When an estate was filed for probate, it was assigned a number. (This is also true of guardianship and lunacy cases). This number is found in all the Probate Books and on the original documents in the Probate Packets. In about 1935 all of the cases completed were assigned a NEW number and classified as 'disposed cases.' For this reason the number found in the records is different from the number that the cases are now filed under. To locate the original records, the NEW number must be used.

The numbers in this index are the NEW numbers that were assigned to these cases in the 1930's. These NEW numbers appear to have been assigned to these cases by ten year periods according to the time they were completed and all for that ten year period was put in somewhat alphabetical order and then the process started over for the next ten year period. This process was continued for all the completed cases to about the year 1935.

The probate cases of Dallas County, Texas also include guardianship cases and lunacy cases. Guardianship cases not only pertain to minor children, but to a person of any age who was not able to competently handle his own affairs. Lunacy cases included not only those who were insane or mentally incompetent, but of advanced age who were unable to take care of their own affairs due to senility.

INSTRUCTIONS

ORDER OF MICROFILMING:

These probate cases were microfilmed in numerical order by the disposing case number (this being the NEW number assigned to these cases in about 1935).

SPELLING OF NAMES:

It should be noted that some of the names are spelled various ways. In many instances the name was spelled by sound. Some of the handwriting was very difficult to read, often making it difficult to determine the correct spelling.

NUMBERS OR LETTERS PRECEDING CASE NUMBER:

This indicates that the same number was assigned to more than one case and to differentiate the different cases, either a number or letter was added to the case number.

MISCELLANEOUS PACKETS:

Some case numbers were assigned to several individuals and was indicated as miscellaneous. In these cases the documents were put in alphabetical order by the individuals name for microfilming these cases.

FILING DATE INFORMATION:

On the outside of most of the folded documents is found a filing date. The documents itself was filmed and on the next frame the filing date information of that particular document is found. The filing date will ALWAYS follow the document on the next frame.

ORDER OF DOCUMENTS:

The documents from these case packets were not put in any particular order for microfilming, however in most cases the vouchers, payments, receipts, etc. were filmed first, followed by the other documents.

Oversize Documents:

In some instances there were extremely large documents, therefore it was not possible to get the entire document filmed on one frame. In these instances the document was filmed in the following sequence: Upper left portion, followed by the upper right, the lower left, the lower right, etc. until the entire document was filmed.

Some documents were glued together thus forming one long document (such as an inventory) and several frames were needed to film the document. These were filmed in such a way to allow the reader to continue from one frame to the next with a few lines repeated in filming so as not to miss any of the information.

Small Documents:

Several documents were often filmed on the same frame.

INSTRUCTIONS - continued.

RECEIPTS, VOUCHERS, ETC.

When this type of document was filmed, if there was a signature on the reverse side, it was filmed on the next frame. Not all payments and receipts were signed on the back.

MISSING PACKETS:

Some of the probate packets are missing. The name and number was obtained from the original index book to the new numbers. Although the original documents are missing, information may be obtained from the probate record books, will books, and probate docket books.

To identify the cases that are missing the following symbols have been used in this index:

- \* - Original documents missing. Names obtained from original disposed case index book.
- \*\* - Filmed as missing, but were located before microfilming project was completed and are microfilmed following case 3,100.
